Cozy Homes Can Kill Plants

Your warm, cozy home can be most comfortable to you, but it could be killing your house plants.

Low humidity, excess salts, or improper watering may cause symptoms that resemble various plant diseases.

Some wilting can occur if plants get too much fertilizer or are watered improperly. Thoroughly soak the plant when you water. Then let the top ¼ inch of the soil dry before you water again. If the soil is moist ¼ inch down, don't water.

Some loss of leaves often is caused by rapid temperature changes, dry air, cold drafts and exposure to gas furnace fumes, or change from a sunny to a dark location.

Unnaturally small leaves, especially at the top of the plant where new leaves are generated are usually the result of too little light. This is especially common when outdoor plants are brought inside for the winter or changed from location to location.

Begonias, African Violets and ferns are especially sensitive to low humidity. Plants moved from a cool, moist greenhouse or florist shop to a warm, dry home are vulnerable to damage from this rapid change in environment.

The low humidity common in many homes during the winter may cause spotted or scorched looking leaves. It may also cause blossoms and leaves to fall off of plants.

You can increase the humidity around potted plants by setting them on a brick or inverted pot in a large pan of water. You also can put them in a planter filled with moist sphagnum moss, sand, vermiculite or pearlite.

Yellowing of lower leaves is another common problem with houseplants. This may be caused by root rot, too much or too little water or too little fertilizer.

If the plant leaves are yellow, first check to see if the pot drainage hole is plugged or if the plant is standing in water. Excess water causes oxygen starvation and will contribute to root rot.

Next tap the root ball from the pot and examine the roots carefully. If the soil and roots are in good condition, all the plant probably needs is fertilizer. As a general rule, feed plants once a month. If you prefer to fertilize everytime you water, reduce the rate of fertilizer accordingly. Select a plant food that contains trace mineral elements as well as nitrogen, phosphorus, and potassium.

The lower leaves on houseplants such as rubber plant, cut-leaf philodendron and dumbcane yellow naturally and drop off as the plant gets older. When the plant becomes too bare of bottom leaves, air layer the top portion and create a new plant.

A general leaf yellowing at the top of your plant can indicate a lack of sunlight or lack or trace mineral elements. Give it more light or fertilizer depending on which disorder is causing the problem.

Water with a high salt content can also cause leaves to yellow or appear burned along the edge. You can correct this situation by occasionally flushing the plant soil with distilled water. You can also change the potting soil as the salts start to accumulate. This you see on the top of the soil. Many people avoid salt build-up problems by watering only with rainwater or distilled water.

Homemakers, if you have question or problem you may call 352-8244 or you may write us at P. O. Box 488, Appomattox, Va. 24522. It is always a pleasure to help you and to hear from you.

Special Announcement: On March 5, 1981, a chair seat weaving workshop will be held in the Appomattox County Extension Office meeting room. Workshops will be held from 10:00 - 12:00 noon, 1:00 - 3:00 p.m. and 7:00 - 9:00 p.m. You may wish to attend more than one session in order to complete your project. You should bring a chair that has been thoroughly cleaned and the wood finished and 1 1/4 pounds of 0 size trotline to complete a project. Should you have questions about supplies or attending these workshops, you may call our office.

Homemakers, have a good week!

RECIPE OF THE WEEK
French Onion Soup

3 medium onions, thinly sliced
¼ cup butter or margarine
2 cans (10½ ounces each) condensed beef broth
1 teaspoon Worchestershire sauce
Dash pepper
4 slices of French bread, toasted
Grated Parmesan or Swiss cheese

In covered medium saucepan, cook onions in butter about 15 minutes or until tender. Add beef broth, Worchestshire and pepper; bring to a boil. Ladle soup into broilerproof bowls, top with toast and sprinkle with cheese. Broil until cheese is lightly browned. Serves 4.

This recipe can be doubled or tripled. Bouillon cubes in the proper amount of water can be substituted for the beef broth.

Good news for homemakers

Ways to improve on plowing

By JAMES A. SMITH
Extension Agent

There's still plowing to be done on a number of farms. We could improve the quality of plowing by mounting a rolling coulter in front of each moldboard. The setting is important - the coulter should be off-set 3/4 inch from the moldboard and should go into the soil 1 to 1 1/2 inches. This is particularly important when attempting to cut and incorporate plant residue in the soil.

The chisel plow has gained some popularity in recent years. This tool does not cover trash and plant residue, which may or may not be good, but it does shatter the soil. Many operators credit it with a deeper operation than probably happens. In most cases, it doesn't go deeper than 10 to 12 inches.

The disc harrow is a popular tool, but it does tend to compact the soil - don't over use.

* * *

There's a lot of publicity about minor elements and in some cases under Virginia conditions for specific crops, they are essential.

There has been 29 Virginia experiments on a wide range of soils to determine copper level. The highest was 2.9 ppm., but there were 15 below 1 ppm. In only one case was there a response to copper application - in this situation the soil showed .7 ppm.

All that I am saying is - if they are needed use them - if not save your money.

* * *

Honey bees are having a rough winter. Gilbert Mays tells me that he has already started feeding. With the dry weather of 1980, the winter food supply is short. Don't wait until spring and then discover that all you have are dead colonies. Check yours today.

* * *

The fire cured tobacco market closed on February 5, with a season average of $126.69 on a total production of 3,671,623 pounds. Growers place 71 percent under loan. This compares with the 1979 crop that averaged $107.13 on a production of 5,543,246 pounds. 30 16 percent went under loan.

Previous to this year, the 1976 crop of 5,406,836 pounds that had an average of $117.26.

The 1980 crop averaged about 15 percent above the 1979 crop, which was slightly above the rate of inflation.

There will not be a clean-up sale this year. If there is unsold tobacco, it may be possible to make arrangements through the association to market that tobacco grading C3F or higher directly with the factory. Tobacco that could still be hanging in the barn might be left hanging until the next marketing season.

* * *

There has been a few calls concerning sunflower production. As far as I'm concerned at present prices this crop will have a difficult time competing with soybeans. Nevertheless, if there is interest, we have a publication on production in Virginia.

* * *

Producers interested in filing a physical disaster application with the Small Business Administration must do so no later than March 5.

* * *

There is a new vaccine to help reduce the problem and losses associated with calf scours. The product is called vicogen. It is administered to the cow in a shot six weeks prior to calving, and a booster 3 weeks before calving.

The calf benefits through the colostrum consumed in the first few hours after birth.

At awards banquet

4-H students recognized

Over 150 persons attended the Annual 4-H Awards Banquet last week at the Appomattox County High School Cafeteria. The Awards Banquet is held to recognize those 4-H members who have done outstanding work in one or more project areas during the past year.

Laura Walton, president of the 4-H Teen Leader Club, presided over the banquet and welcomed all who attended. Following an invocation by Terri Nash, 4-H families enjoyed a covered dish banquet supper.

4-Hers recognized at the banquet included: **Achievement:** Dale Glover, Ruby Smith, Allen Smith; **Breads:** Dawn Hancock, Lisa Campbell, Jill Hudson, Amy Morris; **Citizenship:** Jane Guill, David Hancock, Susan Shorter; **Bicycle:** Kathy Clifton, Janet Smith; **Cats:** Cheryl Simpson, Amy Kerr, Aretha Johnson, Dawn Hancock; **Clothing:** Cheryl Wooten, Beth Marston, Amy Archer; **Conservation of Natural Resources:** Kenneth McClenny, Patricia Myrick, Kathy Parsons, Blair Smith; **Consumer Education:** Laurie Cowan, Janet Smith, David Short, Brett Marston; **Dairy:** Dale Glover; **Dairy Foods:** Martha Haley, Florence Miller, Lisa Daubenspeck; **Dog Care and Training:** Scotty Dawson, Dawn Dawson, Rick Pack; **Electric Engergy:** Clinton Saunders, Andre McCoy; **Entomology:** Curtis Moore, John Cawthorne, Cheryl Wooten, Anne Hancock; **Food Conservation & Safety:** Laura Walton, Laurie Cowan, Cheryl Walton; **Food Nutrition:** Dawn Hancock, Janice Abernathy, Andrea Haskins, Tiffany Royal; **Food Preservation:** Tammy Irby, Patricia Myrick, Martha Haley, Karen Gilliam; **Forestry:** Wendy Harris, Cheryl Simpson, Matt Servis, Linda Routt; **Gardening:** Martha Haley, Shirley Cashwell, Matt Servis, Sherry Ferguson; **Health:** Brett Marston; **Home Environment:** Kathy Bryan, Kenita Mullins, Sally Cates; **Home Management:** Tina Moore, Lisa Harrison, Jessica Stanley; **Horse:** Cheryl Simpson, Jeannice Bartelt; **Leadership:** Laura Walton, Glen McClenny, Laurie Cowan; **Petroleum Power:** David Short, T. C. Franklin; **Photography:** Angie Murray, Kathy Parsons; **Public Speaking:** Jo Ann Jamerson, Jennifer Coleman, Jane Guill, Russell Walton; **Veterinary Science:** Ursula Grishaw; **Wood Science:** Duane Elliott; **Community Beautification:** Janet Smith, Beth Marston; **Poultry:** Laurie Cowan, Jo Anna Layne; **Recreation:** Marlene Watkins, Terri Nash; **Sheep:** Pattie Harris, Warren Thoma.

Adult volunteer leaders attending the banquet included: Mrs. Betty Bryan, Mrs. Daisy Watkins, Mrs. Margaret Glover, Mr. John Harrison, Mrs. Ruby Inge and Mrs. Frances Gilliam. Special appreciation was extended to each 4-H volunteer for their valuable assistance with 4-H programs during the year.

David Hancock and Allen Smith recognized the major businesses and civic organizations that provide 4-H support in Appomattox County. Mr. Bill Hunter, president of Farmers National Bank and sponsor for 4-H Public Speaking, was recognized as was Mrs. Patty Booker who represented American Federal Savings and Loan Association, the 4-H Share-the-Fun sponsor. The members of the Appomattox Lions Club were thanked for their support through scholarships to State 4-H Congress and Lawson Ford was recognized for their sponsorship of the 4-H Dog Show in Appomattox.

4-Hers who received state awards during 1980 were introduced, including Glen McClenny, Dale Glover, Blair Smith and Allen Smith in Land Appreciation Judging; Laurie Cowan in Egg Grading; Laura Walton in "Make It Yourself With Wool"; P.D. Myrick in June Is Dairy Month Posters; and Lisa Moore, Susan Parris, David Caldwell, Cheryl Walton and Allen Smith in Achievement Records.

A special Food and Nutrition Award was presented to Martha Haley for her outstanding work in the foods project area.

A slide presentation entitled "4-H in Appomattox" was introduced by Cheryl Walton and narrated by Laurie Cowan and Blair Smith. Members of the Teen Leader Club had prepared the entire script.

The Awards program concluded with the 4-H Pledge, led by Ruby Smith, and the Pledge of Allegiance, led by Jane Guill.

A Question of Law

Editor's Note: Following is one in a series of columns regarding the law which the Times-Virginian will provide as a public service to its readers each month. The monthly question-and-answer column is written by Albert Teich, Jr., professor of business law at Old Dominion University.

Question: Recently, I was in a store looking at a television set. I thought I would like to buy it, but was not sure how good the reception would be in a place other than the store. The clerk said that I could have the set in my home for a ten-day free trial period. I agreed, and the set was delivered by the store to my home. During the ten-day trial period, vandals broke into my home and did quite a bit of damage, including breaking the picture tube on the television set. I have insurance to cover my losses, but a friend told me that the insurance company will not pay for the damage to the television set since I had no responsibility for it. The clerk in the store told me I have to either return the set to its original condition or buy the television set. What should I do?

Answer: Call the store that delivered the television set to you and tell them to come and get the remains of the set, and worry no more. That set was delivered to you on what is known as a "sale on approval." During the ten-day free trial period, the store still owned the set and the risk of loss was with the store. As long as you were not responsible for the damage, you have no legal liability. If you had either intentionally or negligently caused the damage, you would be liable. Neither was the case here, so there is no liability on your part. As for your insurance company, it probably does not have any responsibility to pay for the damage since it is only liable to pay you for your losses.

Question: I am in the process of trying to sell my house. It is completely paid for, and friends keep telling me that I will not be able to sell it unless I take back a second mortgage for part of the purchase price. Is it safe for me to do this?

Answer: Whether or not it is safe for you to take back a second mortgage depends upon the financial strength of the buyer. You should remember that if the buyer ever defaults on the first mortgage, you will have to come in and protect your interests. You might be forced to buy the property back at a public auction held by the first mortgage holder. Unless you are financially well off, this might be almost impossible for you to do, and you could lose your financial interest in the property if it does not sell for enough to pay off the first mortgage, costs of sale and your second mortgage. The rule in foreclosures is that the first mortgage forecloses down and wipes out junior mortgages. Be very careful in taking back a second mortgage for part of the sale price of your home.

Question: I am getting ready to sell my home and the current mortgage carries a very low interest rate. I know that this makes it quite attractive to prospective buyers since this mortgage can be assumed. Is there any risk of my selling to someone, letting them pay me my equity in the home and assume the balance due on the mortgage? If I allow the buyer to assume my mortgage, will I be liable if they default and the mortgage company forecloses?

Answer: Yes, there is a risk in letting someone assume the current mortgage on your home, for if they do not pay and if the mortgage company forecloses and if the sale does not bring enough to pay the balance due on the mortgage plus the costs of the sale, you will be liable to the mortgage company for the deficiency.

Some people think that once they sell and allow the buyer to assume, that they are no longer liable on the mortgage. That is incorrect thinking. The only way you can be released is by either paying off the loan or obtaining a release from the note holder. Another misconception of-many is that they think that if the assuming buyer does not pay the mortgage then they, the seller, can repossess the property. Under the normal sale and assumption, the seller does not have the legal right to do this. Again, be very careful when selling your home. Know who to buy, the financial standing of the buyer and also get as large a down payment as possible. The more a person has invested in their home, the less likelihood of their letting the house run down and/or failing to make the monthly payments on it.

Beef 'Cook-Off' set

What's your beef? Your favorite beef recipe, that is. Check your files because you could be sitting on the winning recipe of the third annual Virginia Beef Cook-Off.

That recipe could be worth $100 for first prize and an expense-paid trip to Sioux Falls, South Dakota to represent Virginia in the National Beef Cook-Off, September 23-25.

The Virginia Beef Cook-Off is sponsored by the Virginia CowBelles, Inc. and will be held in April. Contest entry forms, which must accompany all recipes, are available by writing **1981 Virginia Beef Cook-Off, Virginia Department of Agriculture and Consumer Services, P. O. Box 1163, Richmond, Virginia 23209.** Entries must be returned postmarked no later than March 6.

All recipes must contain two to five pounds of chuck, round, rump, fresh brisket or ground beef. The meat must be exclusively beef. The recipe should be specific, noting the number of servings and approximate preparation time. The contest does not include outdoor or microwave cooking.

A panel of judges will select the final recipes. These will be prepared by the finalists and evaluated on the basis of taste, ease of preparation and palatability, originality and appearance. In case of a tie, the first entry received will win. Second and third place winners will be awarded $50 and $25, respectively.

The contest is open to all 18 years or older, with the exception of state and national CowBelle members or professional home economists.

The Pamplin School

[Continued from Page 1]

below grade-level. A Supplementary Skills Development program was piloted by the State Department of Education during the 1974-75 session for fifth year students. The program for the 1975-76 school year included an SSPP techer for fifth and sixth grade students.

Miss Merel Davis, once principal of the Pamplin School who later went on to teach at RPE (now VCU) and prior to retirement was working for the State Department of Education had a tremendous influence on the school at Pamplin.

"Miss Davis had so many good lessons to share. She was the most positive thinking person I have ever met. When she came back to Pamplin after retirement, she was indeed a friend of the school....always supportive," said Waddell.

Mrs. Waddell, who is on the executive board of the Virginia Association of Elementary School Principals and who is active in education both on a local and state level said, "the faculty of PES believes that students in elementary years should be provided an education environment which will allow each individual child to develop to the best of his abilities and achieve every possible success in these important years. We care about our students and I believe they know it."

Flue-cured meeting set

Flue-cured Tobacco Cooperative Stabilization Corporation, the grower-owned organization which administers the price support program for flue-cured leaf, will hold its 23rd Annual District Meeting for Virginia growers in South Boston, Virginia. Roy B. Davis of South Boston, Director from Virginia, and Fred G. Bond, General Manager, jointly announced that the meeting will be held at the American Legion Building on Wednesday, February 25, beginning at 2 p.m.

The Coop's operational report for the calendar year will be given. Stabilization's stocks totaled 596.7 million pounds as of January 1, 1981. Davis noted that on January 1, 1980 the Cooperative held 547.5 million pounds of tobacco in inventory. He further added that the organization's sales for the calendar year 1980 totaled 88.1 million pounds. This compares to sales of 123.6 million pounds in 1979.

In addition to Stabilization's report, reports will be given by representatives of Tobacco Associates, Inc., Tobacco Growers' Information Committee; USDA's Tobacco Division, Agricultural Marketing Service; and other allied organizations and agencies. Ample time will be provided for discussion.

A brief business session will be held immediately following the regular meeting to elect the Director for the ensuing three-year term on Stabilization's Board to represent Virginia growers. Stabilization's Advisory committee members from each of the flue-cured tobacco producing counties in Virginia will be selected at this time also.

Davis added, "Flue-cured growers are urged to make every effort to attend Stabilization's meeting in order to gain a better understanding of the Cooperative's operations."

THERE WAS A LOT of excitement at the Appomattox Children's Center on Friday of last week as preparations got underway for a Valentine's Party. Regena Royal, Director of the center and Vanessa Clifton, Teacher, are shown with the class of two and three year olds. In addition to seasonal parties, birthday parties for children attending the center are a regular part of the center's routine.

Mid-State Steel purchased by Metalsource

The Metalsource Corporation has purchased the assets of Mid-State Steel Corporation of Appomattox, Virginia. Mid-State is a specialty steel service center serving Virginia and bordering states with stainless, alloy, carbon, structurals, and tool steels. Ray Wingfield, founder of Mid-State will head the new unit of Metalsource which will become part of its Wheelock-Lovejoy & Company Division. Mid-State becomes the 33rd unit of Metalsource with service centers throughout the United States and Mexico.

Speaking of joining Metalsource, Ray Wingfield said: "We are very proud to be joining America's leading and fastest growing source for specialty steel and steel products. With our new association, Mid-State can bring to our customers a greatly expanded range of specialty steels and special processing available through Metalsource. At the same time we offer the local service and responsive attention our customers have learned to expect from Mid-State. We shall also have available the financial strength of Metalsource with which to expand our present stocks and facilities." "I am very excited about being associated with the best in our business," Wingfield added.

Metalsource was represented at the signing by Willard R. Bell, Vice President and Assistant to the President. Responding to Wingfield's remarks, Bell said: "Ray, we welcome you to the family of Metalsource and, through Metalsource, to Alco Standard. As you know, we are made up of entrepreneurs just like yourself who know our own business and recognize that we gain added strength from joining hands and working together. We are proud to welcome you to Metalsource and to Alco."

Other nearby Metalsource units include Metalsource/Charlotte and Wheelock Lovejoy plants in Conshohocken, Pa. and Cincinnati, Oh.

Also Standard, The Corporate Partnership, with headquarters in Valley Forge, Pennsylvania, is a diversified corporation serving the areas of manufacturing, distribution and resources.
